

Ingeniously Simple Textile Printing

Finding the right DTG printer can be challenging in today's market. There are plenty of options available with widely varying features and price tags. The R-Jet 5 makes the decision simple. It has the features that are most important to you, like ease of use, inline white and color printing, white ink circulation, and a full featured RIP package. With our bulk ink system, the R-Jet 5 is also very economical to run. Our built in ink calculator lets you know exactly how much each design costs per print so you can price jobs accurately, without surprises.

The R-Jet 5 has a patented transport system and unique garment box that loads smoothly and easily. The box is removable and interchangeable for maximum productivity and flexibility.

The real standout of the R-Jet 5 is the image quality. With prints up to 1440 DPI, the most detailed art will print crisp and vibrant. Our RIP software allows for complete ink control, from automatic white generation, to drop out blacks that allow the shirt color to be part of the art, saving on ink. The RIP gives you all the features you need to produce stunning designs that pop off the shirt.

THE R-JET 5 TEXTILE PRINTER

Direct-to-Garment Printing Solution

- Proven Economy
- Ink Cost Calculator
- Compact Footprint
- 1440 DPI Resolution
- Bright, Vibrant Prints
- Intelligent White Ink Control
- Inline CMYK+White Printing
- Patented Transport System
- Unique Garment Box Design

The R-Jet 5 direct to garment printer and accessories have earned the title of No.1 in Europe for reliability, quality and cost effectiveness. EXILE Technologies has partnered with Resolute DTG to bring this amazing printer to the U.S. market. Manufactured in Italy to a very high standard, the R-Jet chassis has a worldwide patent and utilizes proven inkjet technology. The print engine used in the R-Jet 5 is exclusive to the R-Jet5 and cannot be found in any other DTG printer.

The R-Jet 5 is superior in build quality, reliability and price. It is the only direct to garment printer available on the market with iWICS (intelligent white ink control system). The iWICS pressurized system not only purges air from the ink system, it delivers ink to the print head in a way that allows it to print 30% faster. It also automatically recirculates the white ink to avoid costly purges and keeps the system printing perfectly even when not used daily.

Our pre-treater is the perfect companion to the R-Jet 5. This compact unit cleanly treats dark garments in close proximity to your DTG system with no concern about overspray contamination. It puts down a very even coating that ensures top quality white underbase printing on the R-Jet5.

Printer	R-Jet 5™ direct to garment printer
Maximum print size	360 x 465mm (14" x 18")
Ink colors	CMYK + white
Ink type	Exile Textile Ink
Ink supply	High capacity bulk system
