

Upgrade your DTS/CTS system!

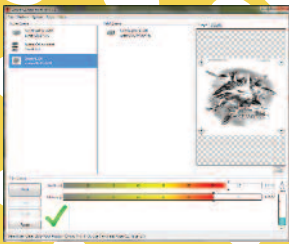

Do you own or operate a KIWO I-Jet, OLEC DSI, or Douthitt CTS?

Transform your system into a new

The upgrade includes all these features and more:

- Modern Software Interface • Touch Screen Control • Bi-Directional Printing
- Faster Speeds • Enhanced Dot Placement • Stable Performance • Improved Quality
- Simplified Electronics • Precision Printhead Control • Excellent Service/Support

The new Spyder II touch screen interface allows the user to easily drag and drop files into the control panel for easy printing and job re-ordering. Enhanced preview and templates make positioning your job on screen a breeze. Now you can rotate, mirror print, auto center and more, right from the Spyder II control panel. You can also assign unique templates to individual hot folders, creating a streamlined workflow.

With fewer, and more advanced electronics, the Spyder II provides improved quality and reliability. The simplified structure ensures a stable system, with long term dependability. The new bi-directional printing function renders an impressive gain in speed, while greater control over dot size and dot placement improves print quality.

This affordable upgrade from EXILE Technologies is the best way to breathe new life into your older DTS/CTS system.

If you have a wax ink DTS/CTS system from one of the companies listed above, ask us how we can re-invent it as a new Spyder II.
